This is an office action for serial number 10/720,627.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 18-21, 23, 24, 26-28, 30-34, 38-45, 48, 49, and 51 are rejected under 35 U.S.C. 103(a) as being unpatentable over DE 19775273 (DE 273) in view of Page et al. (Page) 6,443,403. DE 273 discloses a fastener element (15) having a holding pin (22) having a catch element (24), a rectangular shaped frame (16) having a parallel pair of opposed ledges (near 18a and 17a), a rectangular shaped opening (between ledges), opposed pair of sides (17 and 18), a flange (between 21 and 24), a plurality of projections (19); a deflectable holder (10) having spring fingers (11 and 12) with a ramp (14), a catch (13), and a locking surface (top of 13 between 20 and 13), and concave surfaces/outwardly facing surfaces (4) (the plug-in snap coupling being the fingers). DE 273 discloses all the

Art Unit: 3632

limitations of the claimed invention except for the deflectable holder. Page teaches that it is known to have a deflectable holder (10) having spring fingers (30). It would have been obvious to one having ordinary skill in the art to have modified DE 273 to have made the holder and spring fingers deflectable as taught by Page for the purpose of providing a better means to facilitate attachment of the holder to the fastener element.

#### ***Allowable Subject Matter***

Claims 22, 25, 29, 35, 36, 37, 46, 47, 50, and 52 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Response to Arguments***

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

#### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is

Art Unit: 3632

reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
